Summary

Full-stack developer with 10+ years of experience as a healthcare professional working on cross-functional teams in high-demand environments to deliver time-sensitive services; currently seeking a role as a developer

Projects

MyDish - Full-Stack Developer

May 2020

A mobile app that helps users view, share, and save recipes with version control features

Tech stack:

React Native | Redux | NodeJS | Express | PostgreSQL | Knex | SuperTest | Jest

- Served as a full-stack developer expanding test coverage, debugging existing features, and planning and implementing new features to meet the stakeholder's demands
- Collaborated with a cross-functional team of full-stack developers and data scientists that emphasized planning, team communication, and pair programming through problems and features

The Posh Potluck - Lead Front-End Developer

March 2020

A web app that helps users plan, share, and organize potluck events

Tech stack:

React | Redux | Material-UI | NodeJS | Express | SQLite3

- Lead a team of 3 developers to create the front end of the application
- Collaborated with back-end developers and UX designers to design and implement the application

Employment
